ABOUT ME

I have been self-learning web development since January 2021. Until now I developed 10+ projects using different skillsets: HTML, CSS, Javascript, SASS, React JS.

My objective is to be master at Front End Development and become Full Stack Developer in the future.

Taught myself basic responsive web design, logical thinking and data-flow handling.

University of Science and Technology of Hanoi

From 2012 to 2015

Graduated Environment bachelor degree with GPA of 14/20.

LANGUAGES

English (IELTS 7.0)

SELECTED WEB PROJECTS

BNS Furniture

<https://furniture-ecommerce-1905.netlify.app/>

- React.js, React Hooks, Context API, Styled-components, Axios, React Slick, AOS.

Built single, responsive page application for a furniture company

- fetch data from a 3rd party API. Viewers can search, filter, sort products as well as add items to cart by using context API.

Wooder

<https://phduy1905.github.io/Wooder/>

- A single responsive landing page using HTML, CSS, Javascript, jQuery, Flickity, Animation On Scroll.

Personal Portfolio

<https://phduy1905-react-portfolio.netlify.app/>

- I created my own personal portfolio, responsive for all devices and using React JS to optimize user experience.

Kymco Website Clone

<https://phduy1905.github.io/kymco-clone/>

- In this project, I learnt how to make a multiple-page website. This project was developed in HTML, CSS, Javascript and jQuery.

EXPERIENCE

Community Operation Specialist

From 2018 to 2021 | TDCX Thailand

- Review reported content and respond to user inquiries with high quality, speed, empathy and accuracy.
- Investigate and resolve issues that are reported such as requests for account support and reports of potentially abusive content.
- Gather, analyze, and utilize relevant data to develop ways to improve the overall user experience on the site.

Sales Executive

From 2017 to 2018 | Vietnamhousing

- Inspect real estate properties based on customers' interest.
- Ensure of evident contact between tenants and owners.
